10 Franklin Street is a two story building originally constructed as a bank headquarters in the 1930's for Monroe Savings Bank. In the 1980s or 1990s it became the local headquarters for M&T Bank. At some point in the late 1990s, the building was donated by M&T to the Salvation Army. The Salvation Army used the building as their offices until they vacated the building in about 2007. Around 2009, the first floor was leased to a retail company called Villa. Villa has occupied the first floor to this day and has 1 year left on their lease. The Salvation Army sold the building in or about 2014. There is 9100 square feet on the each floor as well as an additional 9100 square feet in the basement. There is also parking for approximately 8 cars.

After extensive discussions with a prospective tenant affiliated with a large local employer, 10 Franklin Street, LLC (we) purchased the two story building in October 2018. The investment made sense to us based on the tenant's significant interest. Late in January 2019, we were notified by this tenant that they had changed their mind. As a result, we have had to reanalyze possible uses of the building. We have found that, unfortunately, commercial office space and/or bank space is not in demand in downtown Rochester. Additionally, the configuration of the building between two other buildings resulted in limitations to residential development due to code restrictions for window placement. We have two choices. One, sell the building for a loss, having overpaid. Or, two, try to make a go of the building by converting the second floor to residential. (3 unique larger apartments) and the basement into another business. We have chosen the latter.

We have compiled plans to convert the second floor to three large, market rate units including one 2200 sq ft 3 bedroom unit, one 1900 sq ft 2 bedroom unit and one 3000 sq ft 2 bd +den unit. This configuration meets code requirements and also addresses the need for larger units to appeal to families downtown. We have plans to open a boutique fitness studio in the basement, having recognized the need for services for the current downtown residents and work force. We believe this will significantly contribute to the continued residential and business growth in the area.

The second floor and basement of the bank building have been essentially untouched since the 1960s and has been vacant for at least 10 years. There is significant deferred maintenance some of which includes asbestos abatement, HVAC and infrastructure replacement and repairs, roof replacement, electrical, window repairs and more. This conversion of a commercial space to residential will be much more costly than our intended commercial use when we purchased the building.

As a result of significant deferred maintenance and residential conversion, project estimates are high. In order to make this project viable we need assistance wherever we can get it. We have spoken with the city about the CUE tax abatement program and help with the asbestos remediation. Assistance with mortgage and sales tax exemption, etc, will enable us to complete this project as planned and help us contribute to the exciting transformation occurring downtown Rochester.
